## Highlights

### The Country Collaboration Framework: a message from the Alliance Executive Director

The Country Collaboration Framework (CCF) was developed by the Alliance based on the *Kampala Declaration and Agenda for Global Action*. The objectives of the CCF is to facilitate country actions in addressing the health workforce crisis. You will find below a draft version of the document. Members and Partners are especially invited to provide the Secretariat with their inputs and recommendations. The CCF will be rolled-out to countries through a series of consensus building meetings scheduled to take place in Burkina Faso, Ghana and Viet Nam in the Fall. Read more about the CCF and download the draft document

### WHAT'S NEW

#### [Call for Input: Alliance Online Survey on Proposed Thematic Focus of the 2nd Global Forum on Human Resources for Health](#)

The Global Health Workforce Alliance (the Alliance) is pleased to announce the launch of its survey on the Thematic Focus for the 2nd Global Forum on Human Resources for Health (HRH). We invite all members and partners of the Alliance to join us in this online consultation for feedback on the proposed thematic focus, to refine and prioritize the selection of themes and sub-themes and to raise awareness about the Forum.

#### [Second topic of the Alliance Community of Practice: "Essential HRH Elements In Funding Proposals"](#)

The second discussion of the Alliance Community of Practice "The Exchange" closed on Wednesday, 12 August. The aim of the discussion was to determine the essential questions that should be asked of Human Resources for Health interventions proposed within a grant application. The outcomes of the discussions are captured in a "briefing note" available for download below.
